SUMMARY

Computer Science student specializing in Software Engineering with experience developing games in Unity (C#), backend software, and IT support systems. Passionate about creating engaging software and interactive experiences that leave a lasting impact on users. Proven ability to collaborate on agile development teams, rapidly learn new technologies, and deliver polished projects from concept to completion.

EDUCATION

University of Texas at San Antonio December 2026
Bachelor of Science in Computer Science GPA: 3.65 / 4.00
Concentration: Software Engineering Dean's List: Fall 2023, Spring 2024, Fall 2024, Fall 2025

CERTIFICATIONS

- **Meta Front-End Developer Professional Certificate** — Coursera *In Progress*
- **ServSafe Food Protection Manager Certification** — National Restaurant Association 2026

PROJECTS

Cosmic Cattle Run (RowdyHacks 2025) — *Unity • C# • Git* — [Game Demo](#) October 2025

- Developed an endless-runner game in Unity within a 24-hour hackathon using C#, implementing custom player movement, procedural obstacle generation, and core gameplay systems.
- Designed Mars-themed gameplay mechanics, hazards, and character animations while collaborating with a multidisciplinary team to deliver a polished, playable prototype under a strict deadline.

Potion Parlor — *PHP • MySQL • AWS • HTML/CSS* September 2025 – November 2025

- Developed and deployed a full-stack e-commerce application using PHP, MySQL, HTML/CSS, and AWS.
- Collaborated in an Agile software engineering team using Git and sprint-based development.
- Implemented session-based shopping cart functionality and dynamic product management while integrating a MySQL backend to support persistent user interactions and inventory updates.

Project Leo — *Unity • C# • Git* — [Project Leo Repository](#) September 2024 – May 2025

- Designed and implemented a reusable scene management architecture in Unity using C#.
- Collaborated with developers, artists, and designers using Git to implement gameplay features, integrate assets, and deliver iterative updates within an Agile development environment.

Pac-man Recreation — *Go • Raylib* November 2024 – December 2024

- Designed and developed a turn-based Pac-Man recreation using Go and the Raylib graphics library.
- Engineered Ghost AI, player movement, collision detection, and turn management systems while applying object-oriented design principles and algorithms learned in Fundamentals of Game Programming.

SKILLS

Programming: Java, C#, Go, C, SQL, Python, JavaScript, HTML, CSS, PHP

Tools: Git/GitHub, AWS, Azure DevOps, MySQL, Blender, VS Code, Unity, Unreal Engine, Raylib

WORK EXPERIENCE

Shift Manager — **Slim Chickens** September 2022 – Present

- Trained and onboarded 20+ employees to meet company standards during a new store opening.
- Supervised daily operations and coordinated teams to maintain efficiency during high-volume periods.
- Promoted from Team Member to Store Trainer and Shift Manager over four years, taking on increasing responsibilities in employee training, leadership, and daily operations.

Technology College Intern — **Schertz-Cibolo-Universal City ISD** June 2022 – August 2024

- Resolved hardware, software, and networking issues across multiple campuses using Incident IQ.
- Deployed and configured Windows devices for faculty and students.
- Managed technology inventory while independently completing service requests following training.
